

TEFROKA® PU-E SPORT

Solvent-free, elastic polyurethane-system for exterior decks onboard cruise liners, yachts etc. for application of sport decks, jogging tracks, promenade decks, etc.

Properties:

- one-layer, joint less on levelled deck areas
- excellent structureborne-/impact) sound reduction
(according to ISO 712-2 Ln, w = 54 dB)
- seewatertight
- impermeable
- excellent anti-slip properties after sprinkling with EPDM granulates
- decorative designs
- self-levelling

Technical Data:

Standard thickness:	3 – 5 mm
Density:	approx. 1,3 kg/ m ² / mm
Viscosity (+20° C):	self-levelling
Potlife (+20° C):	approx. 30 minutes

Preparation of Substructure:

Levelling with 2- component PU materials,
f. e. **TEFROKA® PU-1-L** and **TEFROKA® PU-E**
(filled with SBR-granulate).
Other deck types upon request.

* (approved thickness may vary)

* If applied in multiple coats higher thickness is possible

Issued: 30 July 2012, Revision 2.0
