

TEFROLITH® FTG-20

Insulating Ship-Floor for A-class 30 divisions

Insulating mortar-system also for wet areas, requires a weight distribution layer as final layer which is approved as not readily ignitable

Properties:

- non-combustible, A-30 rating, (min. 20 mm)
- low weight
- not self-levelling, formation of slope possible

Preparation of Substructure:

Anchoring clips on deck required!

All deck areas have to be treated with a stable 2 comp. EP-shopprimer fast to saponification, which has to be treated with one coat, **TEFROTEx® SF BONDING COAT**.

Other deck types upon request.

Technical Data:

Installation thickness:

FTG-20 Insulating coat: min. approx. 20 mm (A-30)

Density:

FTG-20 Insulating coat: approx. 0,80 kg/ m²/ mm

Strengths:

TEFROLITH® FTG-20 insulating coat

measurements based on 4 x 4 x 16 cm prisms - after 28 days:

compressive strength: approx. 7 N/ mm²

tensile strength: approx. 2 N/ mm²

Fire Rating:

TEFROLITH® FTG-20 complies with FTP-Code Part 3.

Issued: 30 July 2012, Revision 2.0
